GLEAM[®]

Architectural Hardware

Quality the world trusts

Certification

GLEAM HAS IMPLEMENTED A
QUALITY MANAGEMENT SYSTEM
THAT HAS RESULTED IN
NUMEROUS CERTIFICATIONS
FOR OUR VARIOUS PRODUCTS.
OUR ARCHITECTURAL
HARDWARE IS MANUFACTURED
IN ACCORDANCE WITH
EUROPEAN STANDARDS,
AND WE OFFER A 15-YEAR
WARRANTY ON OUR ENTIRE
RANGE.

OUR STORY

The concept of **Gleam Architectural Hardware** originated with its originator, who thought that a handle was more than just a piece of hardware—rather, it was a sculpture with a distinct personality, akin to a tiny, home-based piece of art.

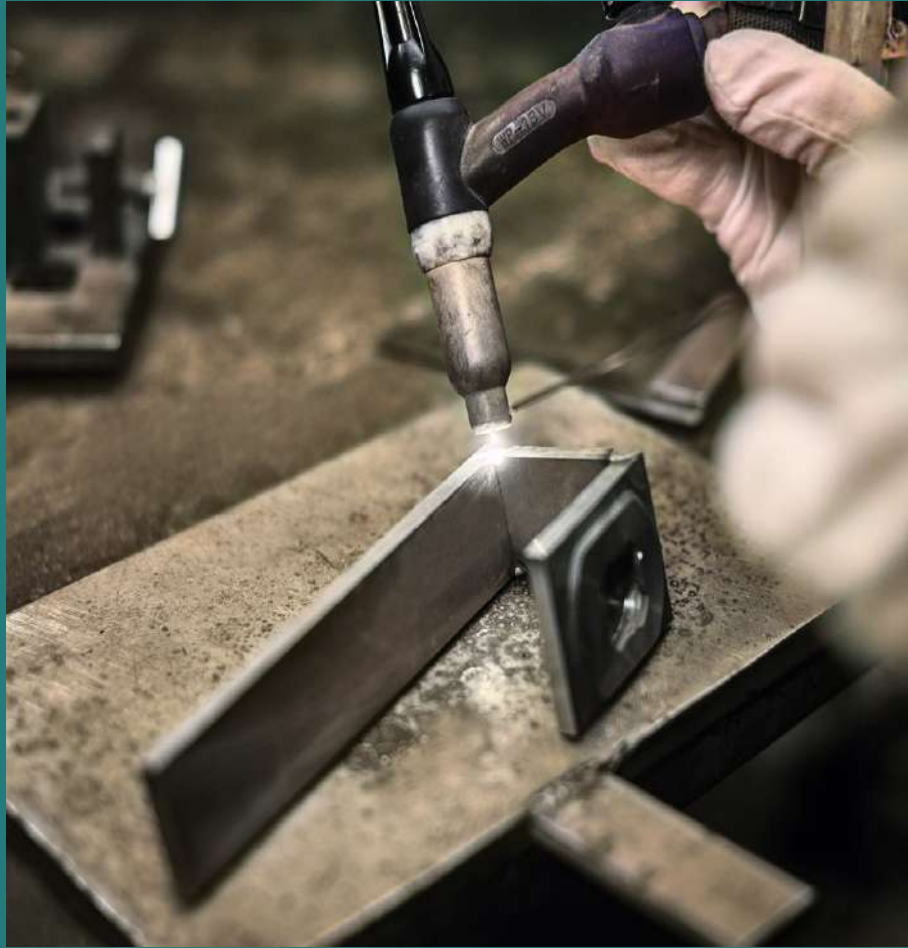

This innovative technique, combined with continual experimentation with new designs and materials throughout the manufacturing process, propelled Gleam into the industrial design industry, where it has since grown into a worldwide known brand.

Since Gleam is established on solid, enduring ideals, its principles are thoroughly infused into its products: every single handle symbolises the company vision.

When designing, the Gleam project culture incorporates passion, wisdom, awareness, invention, dialogue, correctness, effectiveness, and a sense of beauty. All of these variables combine to allow harmony and precision, as well as form and function, to coexist inside these handles, all of which embody the core of UK industrial design.

Gleam's expertise has been integrated into all production processes throughout time. Some abilities are derived from the precision of manual motions that are repeated and mastered over time, while others are derived from experimentation and the adoption of novel techniques and tools: both are vital to the Gleam style.

Finally, the brand's versatility is the result of intensive dialogue with designers and architects from all over the world, which has allowed the brand to develop a rich and distinct skill set. Because of this versatility, Gleam can offer a diverse range of handles and finishes, modify and improve them as needed, and fit them anywhere by adhering to all major international standards.

SUSTAINABILITY

Gleam's entire workflow, from concept to packaging, is based on regard for people and the environment.

Today, all manufacturing companies have a moral obligation to take responsibility for the future, the planet, and future generations. The decisions we make today will have an impact on the world of tomorrow. The Gleam brand is built on care, precision, and dedication. These are complemented by

utmost attention to the efficiency of manufacturing processes and the exceptional durability of Gleam products, which help to drastically reduce resource and energy consumption over time. Gleam has long been committed to using recyclable materials whenever possible, implementing energy and water-saving systems, and recovering and reusing production waste.
